RESTRICTIONS		
Investments	<ul style="list-style-type: none"> Subject to the terms and conditions of the Contract, you may be able to transfer funds between investment accounts. We may be able to substitute investments for you. We may be able to substitute investments for you. We may be able to add, delete, or change investments. We may be able to add, delete, or change investments. 	Making the Most of Your Contract – Transferring Among Accounts Substitution of Investments Optional Benefits — Investment Allocation Restrictions for Certain Benefit Riders

Object of the Contract

Purpose: The purpose of the Contract is to accumulate assets for the benefit of the designated beneficiaries.

The Contract will be a feature of the plan and will be subject to the terms and conditions of the plan.

It is the intent of the parties to the Contract that the assets accumulated under the Contract will be used for the benefit of the designated beneficiaries.

It is the intent of the parties to the Contract that the assets accumulated under the Contract will be used for the benefit of the designated beneficiaries.

Phases of the Contract:

The Contract has the following phases: the Accumulation Phase and the Income Phase.

Accumulation Phase. During the Accumulation Phase, assets will be accumulated for the benefit of the designated beneficiaries. The assets accumulated under the Contract will be used for the benefit of the designated beneficiaries.

A list of funds and additional information regarding each fund in which you can invest is provided in Appendix A

-- **Funds Available Under the Contract.** If you have a Guaranteed Withdrawal Benefit, you can invest in the following funds under the Contract: the Accumulation Phase and the Income Phase. The assets accumulated under the Contract will be used for the benefit of the designated beneficiaries.

Income Phase. The Income Phase begins when you reach the age of 59½. During the Income Phase, the assets accumulated under the Contract will be used for the benefit of the designated beneficiaries.

Assets accumulated under the Contract will be used for the benefit of the designated beneficiaries.

Contract features:

Death Benefits. If you die during the Accumulation Phase, the assets accumulated under the Contract will be used for the benefit of the designated beneficiaries.

Optional Living Benefits. You may have elected a living benefit feature of the Contract. Assets accumulated under the Contract will be used for the benefit of the designated beneficiaries.

Surrenders.

Fee Table and Example

The following tables describe the fees and expenses that you will pay when buying, owning, surrendering, or making withdrawals from the Contract. Please refer to your Contract Data page for information about the specific fees you will pay each year based on the options you have elected.

The first table describes the fees and expenses that you will pay at the time that you buy the Contract, surrender or make withdrawals from the Contract. State premium taxes also may be deducted.

Examples

These examples are intended to help you compare the cost of investing in the contract with the cost of investing in other variable annuity contracts. These costs include Transaction Expenses, Annual Contract Expenses, and Annual Fund expenses.

These examples assume that you invest \$100,000 in the contract for the time periods indicated. These examples also assume that your investment has a 5% return each year. The "Maximum" example further assumes the most expensive combination of Annual Contract Expenses reflecting the maximum charges, Annual Fund Expenses * and optional benefits available. The "Minimum" example further assumes the least expensive combination of Annual Contract Expenses reflecting the current charges, Annual Fund Expenses and that no optional benefits are selected. Although your actual costs may be higher or lower, based on these assumptions your maximum and minimum costs would be:

Maximum Expenses. Each year you have to pay the maximum charges for the first year. Although your actual costs may be higher or lower, based on these assumptions your maximum and minimum costs would be:

Purchase Payment

Purchase payments are made at the discretion of the participant. If the participant dies before the age of 180 days after the date of death, the purchase payment will be made to the beneficiary. If the participant dies after 180 days after the date of death, the purchase payment will be made to the beneficiary or the estate of the participant.

Minimum initial purchase payments*

Qualified annuities	\$1,000
Nonqualified annuities	\$2,000

Minimum additional purchase payments*

\$50

Maximum total purchase payments** (including a rollover) based on the account age at the effective date of the plan:

The following account age ranges:

through age 85	\$1,000,000
for ages 86 to 90	\$100,000
age 91 or older	\$0

Each account age range if a participant dies before the effective date:

through age 85	\$100,000
for ages 86 to 90	\$50,000
age 91 or older	\$0

* If a participant dies before the age of 180 days after the date of death, the purchase payment will be \$25.

** The maximum total purchase payments are based on the account age at the effective date of the plan. The maximum total purchase payments are based on the account age at the effective date of the plan.

Additional purchase payments can be made after a participant's death to a beneficiary or the estate of the participant.

Additional purchase payments can be made after the effective date of the plan.

Effective March 24, 2021, additional purchase payments are based on the account age at the effective date of the plan.

Participants can make qualified annuity payments after the effective date of the plan.

Participants can make qualified annuity payments after the effective date of the plan.

Participants can make qualified annuity payments after the effective date of the plan.

The following table shows the maximum total purchase payments:

(1) The maximum total purchase payments are based on the account age at the effective date of the plan.

Add the change amount to the Account Balance effective date added to the
Waiting Period of the first 180 days (1) in the effective date and (2) in the
contract is a each effective date.

Account in _____, Account Balance effective date _____, benefit
amount is _____, the change in the change amount is _____, the
effective date is _____.

How to Make Payment

1

By letter

Send your check along with your name and contract number to:

RiverSource Life Insurance Company
70200 Ameriprise Financial Center
Minneapolis, MN 55474

2

By scheduled payment plan

We can help you set up a payment plan.

Life Insurance

If a death benefit is paid, the federal estate tax, the amount of the
benefit is reduced. We will be able to help you understand the
amount of the benefit. Under the current law, the effective date of the
death benefit is the date of the death of the insured.

The Amount of the Death

Amount of the death benefit is the amount of the death benefit (the amount of the
benefit is the amount of the death benefit). If the death benefit is paid, the amount of the
benefit is reduced. The amount of the death benefit is the amount of the death benefit
that is paid to the beneficiary. The amount of the death benefit is the amount of the death benefit
that is paid to the beneficiary. The amount of the death benefit is the amount of the death benefit
that is paid to the beneficiary.

Waiver of surrender charges

We agree to waive the following charges:

- the death benefit payable to the beneficiary;
- the 10% penalty for a withdrawal of funds from the account. The amount of the charge will be waived for the RMD amount calculated under the specific account rules. The death benefit will be waived for the RMD amount, for a 5-year period;
- a withdrawal penalty (Exception: A decedent beneficiary, if age 65 or older, will be exempt from the withdrawal penalty, if the beneficiary is a spouse, child, grandchild, or grandchild of the decedent.);
- the death benefit will be waived for the "Original Estate" decedent beneficiary. Waiver of the death benefit Original Estate Tax Fee Charge, for the additional fee for the death benefit tax;
- a withdrawal penalty for the death benefit; and
- death benefit.

Contingent events

- The death benefit will be paid to the beneficiary if the beneficiary is 60 days before the 30-day period of the 60-day period. The beneficiary will be paid the death benefit if the beneficiary is 76 years of age or older. The beneficiary will be paid the death benefit if the beneficiary is 91 days after the death of the beneficiary. The death benefit will be paid to the beneficiary.
- The death benefit will be paid to the beneficiary if the beneficiary is 12 months before the death of the beneficiary. The death benefit will be paid to the beneficiary if the beneficiary is 12 months before the death of the beneficiary. The death benefit will be paid to the beneficiary if the beneficiary is 12 months before the death of the beneficiary.

Other information on charges: American Family Life Insurance Company will charge a fee of \$30 per month for the death benefit. American Family Life Insurance Company will charge a fee of \$30 per month for the death benefit. American Family Life Insurance Company will charge a fee of \$30 per month for the death benefit.

Possible group reductions: The death benefit will be reduced by the amount of the death benefit. The death benefit will be reduced by the amount of the death benefit. The death benefit will be reduced by the amount of the death benefit.

Annual Accrual Fee

Annual Accrual Fee

Annual Accrual Fee is the amount of the annual charge and will be added to the account.

Annual Administrative Charge

The charge will be applied to the account. The charge will be applied to the account. The charge will be applied to the account. The charge will be applied to the account. The charge will be applied to the account.

The initial charge will be \$50,000. The charge will be \$20 after the first year. The charge will be \$20 after the first year. The charge will be \$20 after the first year.

If the charge is applied to the account, the charge will be applied to the account. The charge will be applied to the account. The charge will be applied to the account.

* The charge will be applied to the account on 5/4/2020, the charge will be \$30.

Monthly Administrative Fee

The charge will be applied to the account. The charge will be applied to the account. The charge will be applied to the account. The charge will be applied to the account. The charge will be applied to the account.

Method of LIFO

Accounting for LIFO

Cost of goods sold is calculated as follows: Beginning inventory + Purchases - Ending inventory = Cost of goods sold.

The FIFO method is based on the assumption that the goods purchased first are the first to be sold. The LIFO method is based on the assumption that the goods purchased last are the first to be sold.

The effect of the change from FIFO to LIFO is as follows:

This is because each time the FIFO method is used, the cost of goods sold is lower than the LIFO method. Since the cost of goods sold is lower, the net income is higher. The effect of the change from FIFO to LIFO is as follows:

How dollar-cost averaging works

Beginning inventory is \$100 and the cost of goods sold is \$100.

The cost of goods sold is \$100 and the ending inventory is \$100.

The cost of goods sold is \$100 and the ending inventory is \$100.

Month	Amount invested	Accumulation unit value	Number of units purchased
Jan	\$100	\$20	5.00
Feb	100	18	5.56
Mar	100	17	5.88
Apr	100	15	6.67
May	100	16	6.25
June	100	18	5.56
July	100	17	5.88
Aug	100	19	5.26
Sept	100	21	4.76
Oct	100	20	5.00

The average cost per unit is \$17.91 and the total cost of goods sold is \$18.10.

The FIFO method is based on the assumption that the goods purchased first are the first to be sold. The LIFO method is based on the assumption that the goods purchased last are the first to be sold. The effect of the change from FIFO to LIFO is as follows:

Accounting for LIFO

The FIFO method is based on the assumption that the goods purchased first are the first to be sold. The LIFO method is based on the assumption that the goods purchased last are the first to be sold. The effect of the change from FIFO to LIFO is as follows:

The assumptions we used in the program are not customized or individualized to your circumstances. Program participants and their unique individual circumstances will vary from the program assumptions, creating differing results. The simulations we used in connection with the program do not include any contract or underlying fund charge assumptions other than an assumed mortality and expense risk charge of 1.0%. Your contract value may be depleted prior to the end of the program. If you follow the program and make downward adjustments to your withdrawals to remain in the "On Track" status, the amount of your withdrawal can significantly decline over time.

Market Timing

Ma e i ig ca ed ce he a e f i e e i he ac . If a e i ig ca e he e f a de ig f d ffe, ac a e ha ea ca ed a S bac ha i e i ha de ig f d i be e . Ma e i ig ca ca e , a i e e f he ac a d be eficia (ie) de he ac a fi a cia .

We seek to prevent market timing. Market timing is frequent or short-term trading activity. We do not accommodate short-term trading activities. Do not buy a contract if you wish to use short-term trading strategies to manage your investment. The market timing policies and procedures described below apply to transfers among the Subaccounts within the contract. The underlying funds in which the Subaccounts invest have their own market timing policies and procedures. The market timing policies of the underlying funds may be more restrictive than the market timing policies and procedures we apply to transfers among the Subaccounts of the contract, and may include redemption fees. We reserve the right to modify our market timing policies and procedures at any time without prior notice to you.

If a person is age 80 or older at the date of death, the amount of the death benefit is reduced if the person has a reduced life expectancy, he or she is not a beneficiary of the plan, or the death benefit has been reduced.

Here are some terms that are used to describe the Standard Death Benefit and optional death benefits:

ROPP Value: is the amount of the death benefit. Additional amounts may be added.

Nonqualified annuities

Spousal continuation: If the annuity is a beneficiary annuity, the annuity is a qualified annuity if the annuity is a qualified annuity. If the annuity is a qualified annuity, the annuity is a qualified annuity. If the annuity is a qualified annuity, the annuity is a qualified annuity.

The annuity is a qualified annuity if the annuity is a qualified annuity. If the annuity is a qualified annuity, the annuity is a qualified annuity. If the annuity is a qualified annuity, the annuity is a qualified annuity.

If the annuity is a qualified annuity, the annuity is a qualified annuity. If the annuity is a qualified annuity, the annuity is a qualified annuity. If the annuity is a qualified annuity, the annuity is a qualified annuity.

- the annuity is a qualified annuity, the annuity is a qualified annuity.
- the annuity is a qualified annuity, the annuity is a qualified annuity.

Qualified annuities

The annuity is a qualified annuity if the annuity is a qualified annuity. If the annuity is a qualified annuity, the annuity is a qualified annuity. If the annuity is a qualified annuity, the annuity is a qualified annuity.

Order. Eligible designated beneficiary may elect to receive the proceeds if died before Required Beginning Date. Eligible designated beneficiary may elect to receive the proceeds if died after Required Beginning Date. Eligible designated beneficiary may elect to receive the proceeds if died after Required Beginning Date.

- he designated beneficiary;
- a child of the decedent who is under age 21 (eligible designated beneficiary who is under age 21);
- the decedent's estate; (7);
- the decedent's estate; 7702B(c)(2);
- a surviving spouse who is under age 10 years younger than the decedent.

However, a designated beneficiary, such as an adult child, may elect to receive the IRA if died before Required Beginning Date.

When a beneficiary is eligible to receive the proceeds, the beneficiary may elect to receive the proceeds as follows:

- the beneficiary may elect to receive the proceeds as a lump sum; or
- the beneficiary may elect to receive the proceeds as a lump sum or as a series of payments if the beneficiary is eligible to receive the proceeds.

Spouse and Non-spouse beneficiary: If a beneficiary elects to receive the proceeds from a designated IRA, a beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

Annuity payout plan: If the beneficiary is an annuity beneficiary, the beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

If You Die After the Annuitant's Death

If you die after the annuitant's death, the beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

Death of the owner: If the beneficiary dies after the annuitant's death, the beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

If the beneficiary dies after the annuitant's death, the beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

Death of the annuitant or of a beneficiary receiving payments under an annuity payment plan: If the beneficiary dies after the annuitant's death, the beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

If a beneficiary elects to receive the proceeds as a lump sum or as a series of payments, the beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

If a beneficiary elects to receive the proceeds as a lump sum or as a series of payments, the beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

HOW WE HANDLE CONTRACTS UNDER UNCLAIMED PROPERTY LAWS

When a contract is owned by a decedent and the beneficiary is not named, the contract may be subject to unclaimed property laws. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments. The beneficiary may elect to receive the proceeds as a lump sum or as a series of payments.

If you are age 75 or younger at contract issue, you may select one of the following optional death benefits: MAV Death Benefit, 5-Year MAV Death Benefit, Benefit Protector Death Benefit or Enhanced Legacy Benefit. If you select the MAV Death Benefit or 5-Year MAV Death Benefit, you may also select the Benefit Protector Death Benefit. The MAV Death Benefit may not be purchased with the *SecureSource* series rider. If you are between ages 76-79 at contract issue, you may only select the MAV Death Benefit. The death benefits do not provide any additional benefit

before the first contract anniversary and may not be appropriate for certain older issue ages because the benefit values may be limited after age 80. Be sure to discuss with your financial advisor whether or not these death benefits are appropriate for your situation.

If you are age 75 or older at the time of death, you can choose to add the Beneficiary Protection to your account.

Qualified annuities have a death benefit that is paid to the beneficiary (see Table Qualified Annuities Reaffirmed Minimum Death Benefit). Since the beneficiary is determined at the time of death, the beneficiary is determined at the time of death. The beneficiary is determined at the time of death. The beneficiary is determined at the time of death.

The Beneficiary Protection is available if you die after the time of death, but before the annuity is annuitized. The beneficiary is determined at the time of death.

- The annuity death benefit is:
- 40% of the annuity death benefit if you die after age 70 and the beneficiary is your spouse;
- 15% of the annuity death benefit if you die after age 70 and the beneficiary is not your spouse.

If you have a beneficiary, the annuity death benefit is paid to the beneficiary. The annuity death benefit is paid to the beneficiary. The annuity death benefit is paid to the beneficiary.

Earnings at death: The annuity death benefit is paid to the beneficiary. The annuity death benefit is paid to the beneficiary. The annuity death benefit is paid to the beneficiary.

Terminating the Beneficiary Protector

- You can terminate the beneficiary protector at any time after the time of death.
- You can terminate the beneficiary protector at any time after the time of death.
- The beneficiary protector is terminated if you die after age 75 and the beneficiary is your spouse.
- You can terminate the beneficiary protector at any time after the time of death.
- The beneficiary protector is terminated if you die after age 76 and the beneficiary is your spouse.
- The beneficiary protector is terminated if you die after age 76 and the beneficiary is your spouse.
- The beneficiary protector is terminated if you die after age 76 and the beneficiary is your spouse.

If your spouse is the sole beneficiary and you die before the annuity is annuitized, the annuity death benefit is paid to your spouse. The annuity death benefit is paid to your spouse. The annuity death benefit is paid to your spouse.

After the annuity is annuitized, the annuity death benefit is paid to the beneficiary. The annuity death benefit is paid to the beneficiary. The annuity death benefit is paid to the beneficiary.

For a complete list of annuity products, see the A and D.

Beneficiary

The beneficiary is the person who receives the annuity death benefit. The beneficiary is the person who receives the annuity death benefit. The beneficiary is the person who receives the annuity death benefit.

If you are age 75 or older at the time of death, you can choose to add the beneficiary protector to your account. The beneficiary protector is available if you die after age 75 and the beneficiary is your spouse.

The Beneficiary has the right to receive the proceeds of the annuity if the annuitant dies before the annuity starts. The beneficiary can be named in the contract or by will.

1. The beneficiary can be named in the contract.
2. The beneficiary can be named by will.
3. The beneficiary can be named in the contract or by will.
4. The beneficiary can be named in the contract.

The beneficiary of the annuity (ADB) is the person who receives the annuity payments after the annuitant's death. The beneficiary must be at least 18 years old at the time of the annuitant's death.

The beneficiary of the annuity is the person who receives the annuity payments after the annuitant's death.

- The beneficiary is named in the contract or by will.
- If the beneficiary is named in the contract, the beneficiary must be at least 18 years old at the time of the annuitant's death.

The beneficiary of the annuity is the person who receives the annuity payments after the annuitant's death.

Covered Life Change: If the annuitant dies before the annuity starts, the beneficiary receives the annuity payments. If the annuitant dies after the annuity starts, the beneficiary receives the annuity payments until the annuitant's death.

Adjustments for Partial Surrenders: Adjustments for partial surrenders are made to the ROPP, ADB, and MAV values.

$$\frac{a \times b}{c} \text{ he e:}$$

a = the amount of the annuity payment received by the beneficiary

b = the annuity payment, ADB, MAV, or the death benefit (b) of the annuity

c = the annuity payment, death benefit (b) of the annuity

ROPP Value, ADB Value and MAV: The ROPP, ADB, and MAV values are the present value of the annuity payments. The ROPP value is the present value of the annuity payments, the ADB value is the present value of the annuity payments, and the MAV value is the present value of the annuity payments.

On each annuity payment date, the ADB, MAV, and ROPP values are adjusted as follows:

1. On the first annuity payment date, the ADB value is 5% of the annuity payment, the ROPP value is 60% of the annuity payment, and the MAV value is 10% of the annuity payment.
2. On each annuity payment date after the first, the ADB value is 5% of the annuity payment, the ROPP value is 60% of the annuity payment, and the MAV value is 10% of the annuity payment.
3. On each annuity payment date after the first, the MAV value is 10% of the annuity payment (after the annuity payment is deducted) if the annuity payment is not deducted.

At age 75, the annuitant dies, the beneficiary receives the annuity payments. The beneficiary receives the annuity payments until the annuitant's death. If the beneficiary is age 76 at the time of the annuitant's death, the beneficiary receives the annuity payments until the annuitant's death.

- If the employee has a change of beneficiary designation, the SecureSource Legacy benefit will be payable if the employee dies. The death benefit of the benefit account will be payable to the beneficiary designated on the account of \$20,000.

Determination of the SecureSource Legacy benefit amount: The death benefit will be determined as follows:

Termination of the Rider

(for contract applications signed prior to 5/4/2020)

The rider can be terminated by either party:

1. **Single Life:** After the death benefit is paid, the rider terminates.
2. **Joint Life:** After the death benefit is paid, either the **Original Source** or the **Beneficiary** as described in the policy can terminate the rider.
3. On the anniversary date the rider terminates.
4. In either case, the **Beneficiary** will receive a **Final** death benefit. Beneficiary

For important considerations on whether a *SecureSource Tempo* rider is appropriate for you, see “Important *SecureSource* Series Rider Considerations” section below.

benefit, the Certificate of Assurance is to be calculated. When the first individual dies, each of the other individuals will receive the benefit of the Life Insurance Policy. The benefit will be paid to the surviving individuals.

The Certificate of Assurance can be calculated in a number of ways. The first is a simple average of the individual death benefits. The second is a weighted average of the individual death benefits based on the individual's age. The third is a weighted average based on the individual's age and the interest rate. The fourth is a weighted average based on the individual's age and the interest rate and the individual's health.

If the first individual dies, the Certificate of Assurance will be calculated based on the remaining individuals.

Single Life: The Certificate of Assurance is to be calculated based on the individual's age at death. The benefit will be paid to the individual's estate.

Joint Life: The Certificate of Assurance is to be calculated based on the age of the first individual to die:

- The individual's age at death will be used to calculate the benefit.
- The date of the individual's death will be used to calculate the benefit.
- Under the first method, the benefit will be calculated based on the individual's age at death. Under the second method, the benefit will be calculated based on the individual's age at death and the interest rate. Under the third method, the benefit will be calculated based on the individual's age at death and the interest rate and the individual's health.

- (C) If the Cost of a Payment is abated, the individual has a right to the Return on a Payment, the Beneficiary and Cost of the Charge.
- (D) If the Cost of a Payment is abated, the individual gets a right to the Return on a Payment, the Beneficiary and Cost of the Charge, and the Beneficiary and Cost of the Charge is abated:

$$\frac{d \times e}{f} \text{ he e:}$$

d = the amount of the individual's Return on a Payment
 e = the Beneficiary and Cost of the Charge (a taxable benefit) of the individual
 f = the amount of the individual's Return on a Payment.

Rider Anniversary Processing: The individual's beneficiary and Cost of the Charge Rider Anniversary. The Beneficiary and Cost of the Charge and the Annual Amount of the Beneficiary and Cost of the Charge \$20 in each. If the Rider Anniversary is a full day, the Net Social Charge is reduced, the amount of the Vacated (the Vacated Amount) is abated, the beneficiary and Cost of the Charge is the Vacated Day.

1. Returns-linked Credit for the Benefit Base: If you did a withdrawal of the amount of the withdrawal decision, the Return on a Payment is abated. The Monthly Cost of the Charge is the amount of the Monthly Cost of the Charge.

The Return on a Payment is the amount of the Monthly Cost of the Charge (including the individual's) of the individual:

$$(a \times b) + c \text{ he e:}$$

a = the amount of the Return on a Payment
 b = the Monthly Cost of the Charge
 c = the Cost of the Charge

The Beneficiary and Cost of the Charge of the Return on a Payment of the Rider Anniversary.

Contract Returns Used for Credit:

- On the first Rider Anniversary

The amount of the Return on a Payment is the amount of the Vacated of the first Rider Anniversary of the charge amount of the individual's beneficiary and Cost of the Charge.

- On Any Other Rider Anniversary During a Credit Period

The amount of the Return on a Payment is the amount of the Vacated of the Rider Anniversary of the amount of the charge amount of the individual's beneficiary and Cost of the Charge.

- The amount of the Vacated of the individual's beneficiary and Cost of the Charge is the amount of the Return on a Payment of the individual's beneficiary and Cost of the Charge.

- If the individual's beneficiary and Cost of the Charge is the amount of the Return on a Payment of the individual's beneficiary and Cost of the Charge, the amount of the Return on a Payment is the amount of the Vacated of the individual's beneficiary and Cost of the Charge.

After the amount of the Cost of the Payment is abated, the individual's beneficiary and Cost of the Charge is the amount of the Cost of the Payment of the individual's beneficiary and Cost of the Charge.

The Return on a Payment of the Beneficiary and Cost of the Charge, the Monthly Cost of the Charge is the amount of the Return on a Payment of the individual's beneficiary and Cost of the Charge.

The Return on a Payment of the Beneficiary and Cost of the Charge, the Monthly Cost of the Charge is the amount of the Return on a Payment of the individual's beneficiary and Cost of the Charge.

2. Annual Step-Up for the Benefit Base: Beginning of the individual's beneficiary and Cost of the Charge, the Annual Step-Up is abated. If you decide to pay the amount of the fee, the Annual Step-Up is the amount of the fee.

The Annual Step-Up is the amount of the fee of the individual's beneficiary and Cost of the Charge (after the charge is abated) of the individual's beneficiary and Cost of the Charge. If the Annual Step-Up is reduced, the individual's beneficiary and Cost of the Charge is:

- The Beneficiary and Cost of the Charge of the amount of the fee,
- The Cost of the Charge of the individual's beneficiary and Cost of the Charge,

- **Single Life:** The Be fi Ba e i be i ce a ed b he A a C edi .

– **Joint Life:** The Beneficiary bears the greater of the cost of the Beneficiary's health insurance or the cost of the Beneficiary's health insurance.

The Cost-Benefit bears the cost of the health insurance of a Cost-Benefit and the Beneficiary bears the cost of the health insurance of the Beneficiary.

The Cost-Benefit bears the cost of the health insurance of (A) the health insurance of the Beneficiary's 95th birthday or (B) the health insurance of the Cost-Benefit, as determined by the Rasmussen Policy Schedule.

– **Annual Step-Ups:** Beginning in the first year, an Annual Step-Up shall be available. If the beneficiary elects to pay the cost of the health insurance, the Annual Step-Up shall be available.

The Annual Step-Up shall be available to the beneficiary if the beneficiary pays the cost of the health insurance (after charges and deductibles) in the year. If the beneficiary does not pay the cost of the health insurance, the Beneficiary, Cost-Benefit and Life Insurance Policy shall be added to the policy:

- The Beneficiary (after an Annual Cost-Benefit is added) shall be the beneficiary.
- The Cost-Benefit shall be the beneficiary of the health insurance of the Beneficiary, if the beneficiary elects to pay the cost of the health insurance of the Annual Step-Up.
- If the Beneficiary's attained age (**Joint Life:** greater of Beneficiary's attained age) is the beneficiary's high age, the high age shall be the beneficiary's high age. The high age shall be the beneficiary's high age if the Annual Step-Up does not apply to the Beneficiary's high age.

OTHER PROVISIONS

Required Minimum Distributions (RMD): If the beneficiary is required to take RMDs from the account, RMDs shall be calculated based on the beneficiary's age as of the end of the year, the beneficiary's RMD shall exceed the beneficiary's age as of the end of the year. The beneficiary shall be required to take RMDs from the account.

- The beneficiary shall be required to take RMDs from the account;
- The RMD shall be calculated based on the beneficiary's age as of the end of the year;
- The RMD shall be calculated based on the beneficiary's age as of the end of the year;
- The RMD shall be required to be taken from the account by the end of the year.

If the beneficiary is required to take RMDs from the account, the RMD shall be calculated based on the beneficiary's age as of the end of the year. The beneficiary shall be required to take RMDs from the account. See Article of the Policy for details.

Spousal Option to Continue the Contract upon Owner's Death (Spousal Continuation):

Single Life: If the beneficiary elects to continue the contract upon the death of the owner, the beneficiary shall be required to pay the cost of the health insurance.

Joint Life: If the beneficiary elects to continue the contract upon the death of the owner, the beneficiary shall be required to pay the cost of the health insurance. The beneficiary shall be required to pay the cost of the health insurance. If the beneficiary elects to continue the contract upon the death of the owner, the beneficiary shall be required to pay the cost of the health insurance.

If the beneficiary elects to continue the contract upon the death of the owner, the beneficiary shall be required to pay the cost of the health insurance. The beneficiary shall be required to pay the cost of the health insurance.

Rules for Surrender: The beneficiary shall be required to pay the cost of the health insurance. The beneficiary shall be required to pay the cost of the health insurance.

If the beneficiary elects to continue the contract upon the death of the owner, the beneficiary shall be required to pay the cost of the health insurance.

- If the beneficiary is required to take RMDs from the account and if the beneficiary elects to continue the contract upon the death of the owner, the beneficiary shall be required to pay the cost of the health insurance.

CURRENT ANNUAL PAYMENT DESCRIPTION

The Age Based Life Insurance Policy is defined as follows:

- When the Contingent Beneficiary is alive: The Age Based Policy shall be a Contingent Beneficiary in the event of the death of the insured (Joint life: the age of the insured shall be the age).
- On the death of the insured (Joint life: the age of the insured shall be the age): If the insured dies before the Contingent Beneficiary is alive, the Contingent Beneficiary shall be the beneficiary of the policy (Joint Life: the age of the insured shall be the age) in a high Age Based, the high Age Based is based on the age of the Life Insurance Policy.
- Under a Section (see also Section 10).
- The beneficiary, death charge is as follows: (A) If the insured dies before the Contingent Beneficiary is alive, the Life Insurance Policy shall be based on the Age Based of the age of the insured. (B) If the Contingent Beneficiary is alive, the age of the insured shall be the age of the insured. If the age of the insured is less than the age of the insured, the Life Insurance Policy shall be based on the age of the insured.

Income Bonus Percentage: The Income Bonus Percentage is the additional amount of the income bonus percentage of the Life Insurance Policy. The beneficiary of the income bonus percentage is the insured. If the beneficiary of the income bonus percentage is the insured, the Life Insurance Policy shall be based on the income bonus percentage of the insured. If the beneficiary of the income bonus percentage is the insured, the Life Insurance Policy shall be based on the income bonus percentage of the insured.

The beneficiary of the income bonus percentage shall be the insured, but if the beneficiary is not the insured:

$$1 - (a/b)$$

$$a = \text{Contingent Beneficiary's share of the income bonus percentage}$$

$$b = \text{Total Income Bonus Percentage of the Life Insurance Policy} \quad S 3Tf3.62 \text{ a-1.2759b}$$

(D) If the Contract is a Paid-up Policy, the death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

$$\frac{d \times e}{f} \text{ where:}$$

d = the amount of the death benefit payable to the beneficiary

e = the death benefit payable to the beneficiary (including any interest) at the time of death

f = the cash value of the Policy at the time of death plus any unearned premium.

Rider Anniversary Processing: The following table describes the death benefit payable to the beneficiary, based on the age of the insured at the time of death, and the Life Insurance Policy's age at the time of death.

- **Annual Credits:** If the insured dies at age 180 or older, the death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

(A) On the first anniversary

The Annual Credit shall be the death benefit payable to the beneficiary at the time of death, less the death benefit payable to the beneficiary at the time of death, plus any unearned premium.

- **Single Life:** The death benefit shall be the face amount of the Policy.

- **Joint Life:** The death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium, less the death benefit payable to the beneficiary at the time of death, plus any unearned premium.

(B) On the second anniversary

The Annual Credit shall be the death benefit payable to the beneficiary at the time of death, less the death benefit payable to the beneficiary at the time of death, plus any unearned premium.

- **Single Life:** The death benefit shall be the face amount of the Policy.

- **Joint Life:** The death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium, less the death benefit payable to the beneficiary at the time of death, plus any unearned premium.

The death benefit payable to the beneficiary shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

The death benefit payable to the beneficiary shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

- **Annual Step-Ups:** Beginning on the first anniversary, a Step-Up shall be available. If the insured dies at age 180 or older, the death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

The Step-Up is a percentage of the death benefit payable to the beneficiary at the time of death (after charges are deducted) in the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium. If the insured dies at age 180 or older, the death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

- The death benefit (after the Annual Credit is added) shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

- The death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium, less the death benefit payable to the beneficiary at the time of death, plus any unearned premium.

- If the insured dies at age 180 or older (Single Life: the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium; Joint Life: the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium), the death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

- **The Withdrawal Adjustment Base on rider anniversaries:** If the insured dies at age 180 or older, the death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

OTHER PROVISIONS

Required Minimum Distributions (RMD): If the insured dies at age 180 or older, the death benefit shall be the greater of the face amount of the Policy or the cash value of the Policy, plus any unearned premium.

- The RMD amount is the value based on the applicable effective date of 401(a)(9), and the order is a d

Joint Life: If the death benefit becomes payable under a Joint Life Insurance Policy, the surviving Joint Life Insurance Policyowner receives the death benefit. If a Joint Life Insurance Policyowner dies, the death benefit is paid to the surviving Joint Life Insurance Policyowner.

If the contract is a general agreement, the death benefit becomes payable:

- each owner of the death benefit of the contract,
- either the contract owner or the other.

Assignment and Change of Ownership

The Single Life rider is a benefit that provides a death benefit to the insured if they die first. The Joint Life Rider provides a death benefit to the insured if either the insured or the beneficiary dies first.

The Single Life rider provides a death benefit to the insured if they die first. The Joint Life Rider provides a death benefit to the insured if either the insured or the beneficiary dies first.

The Single Life rider provides a death benefit to the insured if they die first. The Joint Life Rider provides a death benefit to the insured if either the insured or the beneficiary dies first.

- **Single Life:** The death benefit is paid to the insured if they die first.
- **Joint Life:** The death benefit is paid to the insured if either the insured or the beneficiary dies first.

The Single Life rider provides a death benefit to the insured if they die first. The Joint Life Rider provides a death benefit to the insured if either the insured or the beneficiary dies first.

The Single Life rider provides a death benefit to the insured if they die first. The Joint Life Rider provides a death benefit to the insured if either the insured or the beneficiary dies first.

The Single Life rider provides a death benefit to the insured if they die first. The Joint Life Rider provides a death benefit to the insured if either the insured or the beneficiary dies first.

- **Single Life:** The death benefit is paid to the insured if they die first.
- **Joint Life:** The death benefit is paid to the insured if either the insured or the beneficiary dies first.

For key terms associated with a *SecureSource Core* rider, see "*SecureSource Series Rider Terms*" section.

RATE SHEET PROSPECTUS SUPPLEMENT

The cost of the Single Life rider is based on the insured's age, sex, and health status. The cost of the Joint Life rider is based on the insured's age, sex, and health status, and the beneficiary's age, sex, and health status. The cost of the Single Life rider is based on the insured's age, sex, and health status. The cost of the Joint Life rider is based on the insured's age, sex, and health status, and the beneficiary's age, sex, and health status.

CURRENT ANNUAL PAYMENT DESCRIPTION

Single Life only: Covered Person: The death benefit is paid to the insured if they die first. The death benefit is paid to the insured if they die first.

Joint Life only: Covered Spouses: The death benefit is paid to the insured if either the insured or the beneficiary dies first. The death benefit is paid to the insured if either the insured or the beneficiary dies first.

Current Annual Payment: The current annual payment is based on the insured's age, sex, and health status. The current annual payment is based on the insured's age, sex, and health status.

If the insured dies first, the death benefit is paid to the insured. If the insured dies first, the death benefit is paid to the insured.

- Upon the death of the beneficiary (ee | A a Se -U _ be).
- If the beneficiary is a beneficiary of the annuity: (A) If the beneficiary is a beneficiary of the annuity, the death benefit is the amount of the annuity payment that is not covered by the death benefit. (B) If the annuity is a joint and survivor annuity, the death benefit is the amount of the annuity payment that is not covered by the death benefit.

Determination of Adjustments of Benefit Values: the amount of the annuity payment that is not covered by the death benefit.

1. **At rider effective date**

The death benefit is the amount of the annuity payment that is not covered by the death benefit.

2. **When an additional purchase payment is made**

The death benefit is the amount of the annuity payment that is not covered by the death benefit.

If the death benefit is the amount of the annuity payment that is not covered by the death benefit, the death benefit is the amount of the annuity payment that is not covered by the death benefit.

See | B i g Y O ac P cha e Pa e _ f cha e a e i i a t .

3. **When a withdrawal is taken**

If the death benefit is the amount of the annuity payment that is not covered by the death benefit, the death benefit is the amount of the annuity payment that is not covered by the death benefit.

The death benefit is the amount of the annuity payment that is not covered by the death benefit.

(A) If the annuity is a joint and survivor annuity, the death benefit is the amount of the annuity payment that is not covered by the death benefit.

The death benefit is the amount of the annuity payment that is not covered by the death benefit.

$$\frac{a \times b}{c} \text{ he e:}$$

a = he or she of the annuity

b = the death benefit (a a icab e) he da e of (b t t) he i hd a a

c = he or she of the annuity (b t t) he i hd a a.

- (B) If the Certificate is a Partially Qualified Plan, the Beneficiary can elect to receive the annuity as a lump sum or as a series of payments.
- (C) If the Certificate is a Partially Qualified Plan, the Beneficiary can elect to receive the annuity as a lump sum or as a series of payments.

$$\frac{d \times e}{f} \text{ he e:}$$

d = the amount of the annuity the annuitant receives
 e = the Beneficiary's Cost Basis (adjusted for any tax) the annuitant receives
 f = the actuarial value of the annuity the annuitant receives.

Rider Anniversary Processing: The beneficiary of the Beneficiary's Cost Basis can elect to receive a lump sum, but the beneficiary will receive \$20 in fees each, and the Life Insurance Policy will be charged with a charge to receive a lump sum.

- **Annual Credits:** If the annuitant dies during the term of the annuity, the beneficiary will receive a lump sum of the annuity's value, less a credit for the annuity's value. The Annual Credit will be charged to the Beneficiary's Cost Basis.

(A) On the first day of the month

The Annual Credit will be charged to the Beneficiary's Cost Basis 180 days before the date of the annuity's value, less a credit for the annuity's value.

- **Single Life:** The Beneficiary will receive a lump sum of the annuity's value.
- **Joint Life:** The Beneficiary will receive a lump sum of the annuity's value, less a credit for the annuity's value 180 days before the date of the annuity's value.

(B) On the first day of the month

The Annual Credit will be charged to the Beneficiary's Cost Basis 180 days before the date of the annuity's value, less a credit for the annuity's value.

- **Single Life:** The Beneficiary will receive a lump sum of the annuity's value.
- **Joint Life:** The Beneficiary will receive a lump sum of the annuity's value, less a credit for the annuity's value 180 days before the date of the annuity's value.

The Beneficiary will receive a lump sum of the annuity's value, less a credit for the annuity's value 180 days before the date of the annuity's value.

The Beneficiary will receive a lump sum of the annuity's value, less a credit for the annuity's value 180 days before the date of the annuity's value.

- **Annual Step-Ups:** Beginning on the first day of the month, a Step-Up will be applied. If the beneficiary dies during the term of the annuity, the beneficiary will receive a lump sum of the annuity's value, less a credit for the annuity's value. The Step-Up will be applied to the annuity's value (after charges are deducted) if the annuity is a Step-Up annuity. If the annuity is a Step-Up annuity, the Beneficiary's Cost Basis will be adjusted as follows:
 - The Beneficiary's Cost Basis (after the Annual Credit is added) will be increased by the amount of the Step-Up.
 - The Beneficiary's Cost Basis will be increased by the amount of the Step-Up, if the beneficiary dies during the term of the annuity.
 - If the annuity is a Step-Up annuity (Joint Life: the age of the annuitant at the time of the annuity's value), the annuity's value will be increased by the amount of the Step-Up. The annuity's value will be increased by the amount of the Step-Up if the annuity is a Step-Up annuity.

OTHER PROVISIONS

Required Minimum Distributions (RMD): If the annuity is a Required Minimum Distribution annuity, the annuity's value will be reduced by the amount of the Required Minimum Distribution. The Required Minimum Distribution will be calculated as follows:

- The Certificate is a Partially Qualified Plan;
- The RMD is calculated as follows:

- The RMD is based on the account balance as of the Uniform Life Table date; and
- The RMD is based on the applicable effective date of 401(a)(9), as of the date of the agreement or the date of the effective date.

If the Contract is a Payable Annuity, the RMD is based on the Effective Date of the RMD. The RMD is based on the date of the annuity contract or the date of the contract. See Article 13 for additional information.

Spousal Option to Continue the Contract upon Owner's Death (Spousal Continuation):

Single Life: If a single life annuity is elected, the annuity will continue to the surviving spouse. If a single life annuity is elected, the annuity will continue to the surviving spouse.

Joint Life: If a joint life annuity is elected, the annuity will continue to the surviving spouse. If a joint life annuity is elected, the annuity will continue to the surviving spouse. The joint life annuity is elected, the annuity will continue to the surviving spouse. If a joint life annuity is elected, the annuity will continue to the surviving spouse.

If you did not elect a beneficiary, the annuity will be paid to the estate. If you did not elect a beneficiary, the annuity will be paid to the estate. If you did not elect a beneficiary, the annuity will be paid to the estate. If you did not elect a beneficiary, the annuity will be paid to the estate.

Rules for Surrender: The surrender charge is based on the age of the annuitant. The surrender charge is based on the age of the annuitant. The surrender charge is based on the age of the annuitant. The surrender charge is based on the age of the annuitant.

If you surrender the annuity, you will be charged a surrender charge. If you surrender the annuity, you will be charged a surrender charge. If you surrender the annuity, you will be charged a surrender charge. If you surrender the annuity, you will be charged a surrender charge.

Joint Life: If the annuity is payable for the joint lives of the annuitants, the annuity will continue to be payable for the life of the surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant. If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant. If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant.

Annuity Provisions: If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant.

Under the terms of the annuity contract, the annuity will be payable for the joint lives of the annuitants. If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant.

If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant.

The annuity will be payable for the joint lives of the annuitants. The annuity will terminate upon the death of the last surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant.

RIDER TERMINATION

- The annuity will terminate upon the death of the last surviving annuitant.
- **Single Life:** If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant.
- **Single Life:** If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant.
- **Single Life:** If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant.
- **Joint Life:** If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant.
- **Joint Life:** If the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant.
- When the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant.
- On the death of the last surviving annuitant, the annuity will terminate upon the death of the last surviving annuitant.
- The annuity will terminate upon the death of the last surviving annuitant.
- When the annuity is payable for the joint lives of the annuitants, the annuity will terminate upon the death of the last surviving annuitant.
- The annuity will terminate upon the death of the last surviving annuitant.

For a complete list of riders, see Appendix E.

Ride

(Available for contract applications signed prior to 5/3/2021)

The annuity will be payable for the joint lives of the annuitants. The annuity will terminate upon the death of the last surviving annuitant. The annuity will terminate upon the death of the last surviving annuitant.

Yield to maturity is a measure of the return on a bond if held to maturity. It is the rate that equates the present value of the bond's cash flows to its current market price.

- **Tax Considerations for Nonqualified Annuities:** Unlike the federal estate tax, which is a tax on the estate of a decedent, a qualified annuity is a tax-deferred investment. Withdrawals from a qualified annuity are subject to ordinary income tax. Withdrawals from a nonqualified annuity are subject to a 10% IRS penalty in addition to ordinary income tax.
- **Tax Considerations for Qualified Annuities:**

Benefit election, and if a participant does not intend to adhere to its investment restrictions while this rider is in force.

The Annuity Payout Period

Annuity payments, however, are decided by the annuity contract owner. The annuity contract owner may elect to receive annuity payments for a fixed period of time, for a specified number of years, or for the life of the annuity contract owner. Annuity payments may be made for a fixed period of time, for a specified number of years, or for the life of the annuity contract owner. Annuity payments may be made for a fixed period of time, for a specified number of years, or for the life of the annuity contract owner.

We understand the change in annuity benefits and the change in annuity benefits.

You decide whether to annuitize your annuity contract. If you do not annuitize your annuity contract, you will receive annuity payments for the life of the annuity contract owner. If you do annuitize your annuity contract, you will receive annuity payments for a fixed period of time, for a specified number of years, or for the life of the annuity contract owner.

If you elect to annuitize your annuity contract, you will receive annuity payments for a fixed period of time, for a specified number of years, or for the life of the annuity contract owner.

Amounts of fixed and variable payouts depend on:

- the annuity contract owner's age;
- the annuity contract owner's health;
- the annuity contract owner's investment performance;
- the annuity contract owner's annuity election.

In addition, annuity payments, however, are decided by the annuity contract owner. The annuity contract owner may elect to receive annuity payments for a fixed period of time, for a specified number of years, or for the life of the annuity contract owner.

For information on the annuity contract owner's annuity election, see the annuity contract owner's annuity election.

Annuity Table

The annuity table (Table A and Table B) shows the annuity payments for each \$1,000 of annuity contract value at age 65, 70, and 75. (When elected, the annuity contract owner may elect to receive annuity payments for a fixed period of time, for a specified number of years, or for the life of the annuity contract owner.)

Table A shows the annuity payments for each \$1,000 of annuity contract value at age 65, 70, and 75. The annuity payments are based on the annuity contract owner's age at the time of annuity election. The annuity payments are based on the annuity contract owner's age at the time of annuity election.

Table B shows the annuity payments for each \$1,000 of annuity contract value at age 65, 70, and 75. The annuity payments are based on the annuity contract owner's age at the time of annuity election.

and the annuity is not a qualified plan. If the annuity is not a qualified plan, the annuity is not eligible for the 10% early withdrawal penalty. If the annuity is a qualified plan, the annuity is eligible for the 10% early withdrawal penalty.

If we do not receive instructions: If you do not provide instructions, the annuity will be paid to the beneficiary in a lump sum within 60 days of the annuity owner's death.

If monthly payouts would be less than \$20: We will calculate the monthly annuity payments based on the annuity owner's age at death. If the monthly annuity payments are less than \$20, we will increase the monthly annuity payments to \$20.

Death after annuity payouts begin: If you die after the annuity payments begin, the annuity payments will continue to the beneficiary until the annuity owner's death. The annuity payments will be paid to the beneficiary in a lump sum within 60 days of the annuity owner's death.

Death after annuity payouts begin: If you die after the annuity payments begin, the annuity payments will continue to the beneficiary until the annuity owner's death. The annuity payments will be paid to the beneficiary in a lump sum within 60 days of the annuity owner's death.

Taxes

Under the annuity, the annuity owner has a deferred annuity. Generally, the annuity owner will not pay taxes on the annuity payments until the annuity owner's death. We will deduct the annuity payments from the annuity owner's gross income.

Qualified Annuity

Generally, the annuity owner will not pay taxes on the annuity payments until the annuity owner's death. The annuity payments will be paid to the beneficiary in a lump sum within 60 days of the annuity owner's death.

Annuity payouts: Generally, the annuity owner will not pay taxes on the annuity payments until the annuity owner's death. The annuity payments will be paid to the beneficiary in a lump sum within 60 days of the annuity owner's death. Under the annuity, the annuity owner will not pay taxes on the annuity payments until the annuity owner's death. The annuity payments will be paid to the beneficiary in a lump sum within 60 days of the annuity owner's death.

Under the annuity, the annuity owner will not pay taxes on the annuity payments until the annuity owner's death. The annuity payments will be paid to the beneficiary in a lump sum within 60 days of the annuity owner's death.

Assignment: Surrender Charge

We define the surrender charge by using the following terms: PS = the amount of the cash value at the time of the surrender; CV = the cash value at the time of the surrender; FA = the fee for the surrender; PP = the premium paid for the policy; PPS = the premium paid for the policy plus the fee for the surrender; PPF = the premium paid for the policy plus the fee for the surrender plus the surrender charge.

$$PPS = PPSC + PPF$$

$$PPSC = \frac{PS - FA}{CV - FA} \cdot (PP - PPF)$$

$$PPF = \frac{FA}{CV - FA} \cdot (PP - PPF)$$

$$PP = \frac{PS - FA}{CV - FA} \cdot (PP - PPF) + PPF$$

$$PS = a \cdot (1 + i)^t - \frac{a \cdot i}{1 + i} \cdot \frac{1 - (1 + i)^t}{i}$$

$$FA = \frac{a \cdot i}{1 + i} \cdot \frac{1 - (1 + i)^t}{i} \cdot 10\%$$

$$CV = \frac{a \cdot i}{1 + i} \cdot \frac{1 - (1 + i)^t}{i}$$

We define the surrender charge by using the following terms: PS = the amount of the cash value at the time of the surrender; CV = the cash value at the time of the surrender; FA = the fee for the surrender; PP = the premium paid for the policy; PPS = the premium paid for the policy plus the fee for the surrender; PPF = the premium paid for the policy plus the fee for the surrender plus the surrender charge.

The surrender charge is defined as the difference between the cash value at the time of the surrender and the cash value at the time of the surrender plus the fee for the surrender. Each year the cash value of the policy increases by a certain amount, and the surrender charge is a percentage of the cash value at the time of the surrender.

Full surrender charge calculation

This is a full surrender charge calculation. We will look at two situations, one where the contract has a gain and another where there is a loss:

Assumptions:

- We receive a life insurance policy with a face value of \$50,000.
- The policy has a cash value of \$10,000 at the time of the surrender. The surrender charge is 6.00% of the cash value at the time of the surrender.
- The policy has a cash value of \$10,000 at the time of the surrender.

We will look at two situations, one where the contract has a gain and another where there is a loss:

	Contract with Gain	Contract with Loss
PS:	60,000.00	40,000.00

Step 5. We calculate the charge for the PP in being reduced (PPS) as follows:

$$PPS = PPF + PPSC$$

$$= PPF + (PS - FA) / (CV - FA) * (PP - PPF)$$

PPF for Se 3 =	0.00	4,200.00
PS for Se 4 =	60,000.00	40,000.00
CV for Se 1 =	60,000.00	40,000.00
FA for Se 2 =	10,000.00	4,200.00
PP for Se 1 =	50,000.00	50,000.00
PPS =	50,000.00	50,000.00

Step 6. We calculate the charge as a percentage of PPS. Note that as a result of this calculation, PPS as a percentage has been reduced to:

PPS:	50,000.00	50,000.00
PPF:	0.00	4,200.00
PPSC = a percentage of PPS based on the charge:	50,000.00	45,800.00
reduced by the charge as a:	6.0%	6.0%
charge:	3,000.00	2,748.00

Step 7. The amount of interest earned on the investment is:

Account value reduced:	60,000.00	40,000.00
Surrender charge:	(3,000.00)	(2,748.00)
Account charge (added to the value):	(50.00)	(50.00)
Net full surrender proceeds:	\$56,950.00	\$37,202.00

Partial surrender charge calculation:

This is a partial calculation of the charge as a result of the high interest:

Assumptions:

- We receive a \$50,000 charge as a result;
- Digging for the account value is a result of \$15,000.00. The charge percentage is 6.0%; and
- The value of the investment is reduced.

We will look at two situations, one where the contract has a gain and another where there is a loss:

	Contract with Gain	Contract with Loss
Account value reduced:	\$60,000.00	\$40,000.00
Account value as a result:	58,000.00	42,000.00

We determine the amount of the account value being reduced by the value of the proceeds received. We determine the amount of the account value being reduced by the value of the proceeds received. We determine the amount of the account value being reduced by the value of the proceeds received.

We calculate the surrender charge for each estimate as follows:

Step 1. First, we determine the value of the account as a result of the:

Account value reduced (CV):	60,000.00	40,000.00
Leaving the account value as a result of the account value (PP):	50,000.00	50,000.00
Estimated value of the account (b) (value of the account):	10,000.00	0.00

Step 2. Next, we determine the value of the account (FA) as a result of the account value as a result of the:

Estimated value of the account:	10,000.00	0.00
---------------------------------	-----------	------

	<u>Contract with Gain</u>	<u>Contract with Loss</u>
10% of the fair value of the contract:	5,800.00	4,200.00
FA (before the fee):	10,000.00	4,200.00
Step 3. Net proceeds in PPF, the amount which the fee (FA) exceeds the fee:		
Fee (FA):	10,000.00	4,200.00
Leaving the contract:	<u>10,000.00</u>	<u>0.00</u>
PPF (before the fee):	0.00	4,200.00
Step 4. Net proceeds in PS, the amount which the contract is reduced by the fee:		
PS (deducted by the fee):	15,319.15	15,897.93
Step 5. Net proceeds in PPS, the amount which the PPS is reduced by the fee:		
PPS = PPF + PPSC		
= PPF + (PS - FA) / (CV - FA) * (PP - PPF)		
PPF from Step 3 =	0.00	4,200.00
PS from Step 4 =	15,319.15	15,897.93
CV from Step 1 =	60,000.00	40,000.00
FA from Step 2 =	10,000.00	4,200.00
PP from Step 1 =	<u>50,000.00</u>	<u>50,000.00</u>
PPS =	5,319.15	19,165.51
Step 6. We have calculated the net proceeds of the PPS. Now we have to calculate the PPS, the amount which the fee (FA) exceeds the fee:		
PPS:	5,319.15	19,165.51
Fee PPF:	<u>0.00</u>	<u>4,200.00</u>
PPSC = amount of PPS less the fee:	5,319.15	14,965.51
deducted by the net proceeds of the fee:	<u>. 6.0%</u>	<u>. 6.0%</u>
net proceeds of the fee:	319.15	897.93
Step 7. The amount which the fee (FA) exceeds the fee:		
Contract amount reduced:	15,319.15	15,897.93
Surrender charge:	<u>(319.15)</u>	<u>(897.93)</u>
Net partial surrender proceeds:	\$15,000.00	\$15,000.00

Appendix D: Example Optional Death Benefit

The purpose of this appendix is to illustrate the operation of various optional death benefit riders.

In order to demonstrate these contract riders, an example may show hypothetical contract values. These contract values do not represent past or future performance. Actual contract values may be more or less than those shown and will depend on a number of factors, including but not limited to the investment experience of the subaccounts, Special DCA fixed account and the fees and charges that apply to your contract.

The examples of the optional death benefits in appendix include partial surrenders to illustrate the effect of partial surrenders on the particular benefit. These examples are intended to show how the optional death benefits operate, and do not take into account whether a particular optional death benefit is part of a qualified annuity. Qualified annuities are subject to RMDs at certain ages (see "Taxes — Qualified Annuities — Required Minimum Distributions") which may require you to take partial surrenders from the contract. If you are considering the addition of certain death benefits to a qualified annuity, you should consult your tax advisor prior to making a purchase for an explanation of the potential tax implication to you.

EXAMPLE — ROPP DEATH BENEFIT

Assumptions:

- The contract value at death is \$20,000; and
- The fee schedule includes a fee added to the contract value of \$5,000; and
- The designated beneficiary has elected a \$22,000 and a \$1,500 (including the charge) annuity election; and
- The designated beneficiary is age 73.

We calculate the ROPP Death Benefit as follows:

Contract value at death:	<u>\$23,000.00</u>
Purchase payments minus adjusted annuity election:	
Contract value:	\$25,000.00
Annuity election, calculated as:	
$\frac{\$1,500 \cdot \$25,000}{\$22,000} =$	<u>1,704.54</u>
Death benefit:	<u>\$23,295.45</u>

The ROPP Death Benefit, calculated as the greatest of these two values: \$23,295.45

EXAMPLE — MAV DEATH BENEFIT

Assumptions:

- The contract value at death is \$25,000.
- The fee schedule includes a fee added to the contract value of \$26,000.
- The designated beneficiary has elected a \$22,000, a high-riding annuity election of \$1,500 annuity election (including the charge), and a \$20,500.

We calculate the MAV death benefit, which is based on the greater of three values, as follows:

1. Contract value at death:	<u>\$20,500.00</u>
2. Purchase payments minus adjusted partial surrenders:	
Contract value:	\$25,000.00
Annuity election, calculated as:	
$\frac{\$1,500 \cdot \$25,000}{\$22,000} =$	<u>1,704.55</u>
Death benefit:	<u>\$23,295.45</u>
3. The MAV immediately preceding the date of death:	
Gross value of contract:	\$26,000.00
Contract value adjustment:	+0.00
Annuity election, calculated as:	

$$\frac{\$1,500 - \$26,000}{\$22,000} =$$

1,772.73

• a death benefit of:

\$24,227.27

The MAV Death Benefit, calculated as the greatest of these three values, which is the MAV:

\$24,227.27

EXAMPLE — 5-YEAR MAV DEATH BENEFIT

Assumptions:

3. The MAV immediately preceding the date of death:

The MAV immediately preceding the date of death:	\$25,750.00
Change in value of the annuity contract:	+0.00
Interest earned on the annuity contract:	
<u>\$1,500 - \$25,750</u>	<u>1,589.51</u>
\$24,300 =	

Death benefit value: \$24,160.49

4. The Accumulation Death Benefit value:

The ADB value of the annuity contract: $1.05 \times \$25,000 =$	\$26,250.00
Change in value of the annuity contract:	+0.00
Interest earned on the annuity contract:	
<u>\$1,500 - \$26,250</u>	<u>1,620.37</u>
\$24,300 =	

Death benefit value: \$24,629.63

Enhanced Legacy Benefit, calculated as the greatest of these four values, which is the Accumulation Death Benefit value: \$24,629.63

End of Contract Year	Partial Surrender (beginning of year)	MCAV Adjustment for Partial Surrender	MCAV	Accumulation Benefit Amount	Hypothetical Assumed Contract Value
1	0	0	100,000	0	110,000
2	0	0	115,200	0	128,000
3	0	0	121,500	0	135,000
4	0	0	121,500	0	118,000
5	0	0	121,500	0	100,000

RiverSource Variable Annuity	S- 6710 CA (4/19)

RATE SHEET PROSPECTUS SUPPLEMENT

This Rate Sheet Prospectus Supplement (hereinafter referred to as the "Supplement") should be read and understood in conjunction with the Prospectus. This Supplement is being provided to you for information only and does not constitute an offer of insurance. If you need a copy of the Prospectus, please call 1-800-862-7919. This Prospectus Supplement is being provided to you for information only and does not constitute an offer of insurance. If you need a copy of the Prospectus, please call 1-800-862-7919.

The Rate Sheet Prospectus Supplement has been filed with the Securities and Exchange Commission (SEC) and is available on the Edgar website. File No. 333-229360 for the RiverSource Variable Annuity.

We are including the following information:

- Rider fees for the _____ ;
- Life Insurance Percentage and Age Band for the _____ ;
- Lifetime Payment Percentage for the _____ ;
- Annual Credit Percentage and Credit Period for the _____ ;
- Base Double Age Band for the _____ ;

THE RIDER FEES, PERCENTAGES, AGE BANDS, CREDIT PERIOD AND TERMS LISTED BELOW APPLY TO APPLICATIONS SIGNED ON OR AFTER OCTOBER 28, 2019.

In order to get these terms, your application must be signed and in good order while this Rate Sheet Prospectus Supplement is in effect. Because we reserve the right to change these terms upon notice as provided below, if your application is not signed and in good order while this Rate Sheet Prospectus Supplement is in effect then you will receive the terms that are in effect on the date that you have a signed application in good order. The rider fees, percentages, age bands, credit period and terms, listed below will not change after your application is signed, except as provided in the prospectus (See "Charges – Optional Living Benefit Charges"; "SecureSource Core Rider – Lifetime Payment Percentage/Annual Credits"; "SecureSource Core Plus Rider – Lifetime Payment Percentage/Annual Credits/Base Doubler"; "SecureSource 4 Rider – Lifetime Payment Percentage /Annual Credits"; "SecureSource 4 Plus Rider – Lifetime Payment Percentage/Annual Credits/Base Doubler").

The rider fees, percentages, age bands, credit period and terms listed in this Rate Sheet Prospectus Supplement are subject to change and can be superseded upon 14 days prior notice as provided below. We may periodically issue a new Rate Sheet Prospectus Supplement that may reflect different values than the previous Rate Sheet Prospectus Supplement. Please note that any superseding terms do not apply to applications that are already signed and received by us in good order. Changes to the rider fees, percentages, age bands, credit period or terms listed in this Rate Sheet Prospectus Supplement will be disclosed at least 14 days in advance in a new Rate Sheet Prospectus Supplement filed on Edgar at www.sec.gov (File No. 333 – 333-229360 for the RiverSource RAVA 5 Choice Variable Annuity).

RIDER FEES

Rider	Single Life Option	Joint Life Option
SecureSource Core SM	1.45%	1.55%
SecureSource Core Plus SM	1.65%	1.85%
SecureSource 4 [®]	1.35%	1.50%
SecureSource 4 Plus [®]	1.45%	1.70%

(Charged as a percentage of the face amount of the annuity.)

LIFETIME PAYMENT PERCENTAGE

The Lifetime Payment Percentage is used to calculate the Current Annual Payment.
